ANIMAL CONTROL

How to help a dog or cat left in a hot car

- Take down the car's make, model and license plate number.
- If there are businesses nearby, notify their managers or security guards and ask them to make an announcement to find the car's owner.
- If the owner can't be found, call the non-emergency number of the local police or animal control and wait by the car for them to arrive.

Signs of Heat Stroke

Signs of heat stroke include panting, staring or stupor, breathing difficulty, an anxious expression, refusal to obey, warm dry skin, fever, rapid heartbeat, vomiting, diarrhea, seizures, and collapse.

If you observe any of these signs, call your veterinarian immediately.

Get the animal out of direct heat and get it wet in a wading pool, with a hose, or by covering it with towels soaked in cool water.

Tips & Tricks

Leave your dog at home

Your dog really does not need to go to the store or for a ride with you every time you leave your home. It can be life threatening during the summer months. Cracking a window to vent your cat is like cracking an hot oven – then oven continues to heat up regardless of the vented door !!!

Festivals and Parades

DO NOT take your pet to festivals, parades, or crowded outside event – pavement is extremely hot and can burn paws – there is low air circulation in crowded areas and temperature is hotter lower to the ground.

Exercise

Avoid exercising on hot or humid days and nights.

90°

102°

120°

Even if the temperature outside is only 70°, the inside of your car may be as much as 20 degrees hotter!

On an 85° day, it only takes ten minutes for the inside of your car to reach 102°.

Within just 30 minutes, the car's interior can climb from 85° to a scorching 120°.

Tips & Tricks

Walk Your Dog When It's Cool

The best time to walk your dog is in the morning or late evening, when the pavement is cool. Avoid walking your dog in the afternoon when the sun is high in the sky or early evening, because the pavement will be hot.

Stay On The Grass

If you end up taking your dog out during the warmer times of the day, be sure to stay on the grass and stick to shady areas. Stay away from sidewalks or any paved areas to avoid burning.

Check Dog's Paw Pads Daily

If you do happen to see a problem, or if your dog is acting strangely on his feet, be sure to have him taken to the vet to see how bad the injury is.

Camp Fire Safety

CAMP FIRES WITH FAMILY AND FRIENDS ARE GREAT FUN!

TO MAKE YOUR NEXT CAMP FIRE SAFER, REMEMBER TO:

- Check the [fire danger map](#) first to make sure it's safe to have a fire where you are.
- Avoid burning on windy days.
- Keep your camp fire less than 3 feet high and less than 4 feet wide.
- Keep flammable objects and debris at least 3 feet away from the fire.
- Never burn trash, including paper products, plastic, glass, and metal (like tin and aluminum cans).
- Burn only local firewood.
- Burn only dry, plain wood
 - No pressure-treated lumber or plywood, and no painted or stained wood.
 - Untreated wood, split tree logs, and branches are recommended.
 - Using heat-treated/kiln-dried wood can prevent the spread of invasive species.
- Never use fire accelerants such as kerosene, gasoline, or lighter fluid.
- Stay out of the smoke. Inhaling smoke is unhealthy for you and for your pets.
- Keep water or a fire extinguisher nearby. Never leave your fire unattended.
- When you're finished with your fire, fully extinguish it. Stirring water or dirt into the remains of the fire can help.

WE WANT YOU TO FULLY ENJOY YOUR CAMP FIRE!

**FOLLOWING THESE GUIDELINES WILL HELP ENSURE
A SAFER GATHERING.**
